

An experimentally-validated multi-scale materials, process and device modelling & design platform enabling non-expert access to open innovation in the Organic and Large Area Electronics Industry (MUSICODE)

Grand Agreement: 953187

Project Start Date: 01/01/2021

Project Duration: 48 months

Deliverable 4.3

Report on graphical (BPMN compliant) workflow editor

Date: 28-06-2022

This project has received funding from the European Union's Horizon 2020 Research and Innovation Programme under the Call DT-NMBP-11-2020 "Open Innovation Platform for Materials Modelling"

Project co-funded by the European Commission within Horizon 2020 Research and Innovation Programme		
Dissemination Level		
PU	Public	
PP	Restricted to other programme participants (including the Commission Service)	
RE	Restricted to a group specified by the consortium (including the Commission Services)	
CO	Confidential, only for members of the consortium (excluding the Commission Services)	x

Deliverable author(s): Dario Campagna (ESTECO)

Contributors: Mattia De Bernardi (ESTECO), Alan Del Piccolo (ESTECO), Mattia Milleri (ESTECO), Davide Di Stefano (Ansys), Bořek Patzák (CVUT)

Draft Revisions:

- v1.0, 10/06/2022, Dario Campagna (ESTECO)
- v1.1, 17/06/2022, Dario Campagna (ESTECO)
- v2.0, 28/06/2022, reviewed by the coordinator

Publishable summary

The MUSICODE Workflow Editor will assist the expert user/translator to design complex modelling workflows that will be stored in the DMS as MuPIF-compliant Python scripts. This deliverable reports on the status of the MUSICODE Workflow Editor as of month 18. The editor is already available to project partners, integrated with the DMS, and capable of translating BPMN models into MuPIF workflows. The MUSICODE Workflow Editor development will continue until month 42, refining and extending the functionalities here presented.
